Short Notes:-

1) Silk Route

The name Silk Route points out to the importance of Chinese Silk Cargoes along with the same route as they export silk to other countries.

- Several Silk Routes have Identified over land and by sea.
- This route is also used to spread religions like - Buddhism even by the fifteenth century, this route became popular to carry food items too.

2) Importance of Silk Route:-

- These were very important as they linked different countries together.
- By the fifteenth century Asia, Europe and North Africa linked from each other.
- These routes gave golden opportunities to the Merchants and travelers for their trade, ideas and spiritual fulfillments.

3) Conquest, Disease and Trade-

- During the Pre-Modern world through the Indian Ocean trade affected very badly because European Conquest America with the result of Biological War.
- Until the nineteenth century, Poverty and hunger were common in Europe and cities were crowded with deadly Diseases.

There were religious conflicts everywhere so, thousands of Europeans migrated to America.

We know, till 19th century India and China were richest countries but in 15th century, China said to have restricted overseas contacts and to be into isolation. So, all trade moved westwards and Europe became the center of world trade.
